

Productivity Redesigning

Improving productivity and delivering quantifiable results for a leading oil and gas service provider

CHALLENGE

- Pending sales orders leading to revenue loss, margin erosion and on time delivery issues
- Non competitive productivity standards
- Low machine, manpower and gage utilization
- Quality, health and safety compliance issues

APPROACH

- Data driven process analysis in over 7 locations across South East Asia
- Establishing enterprise standards
- Monitoring production scheduling plans vs actual for each worker, over 4 months
- Focused approach to bring reworks and rejections to minimum
- Enabled business and operational excellence
- Data analytic driven inventory management

RESULTS

Aligned HR strategy to company's vision

USD 27Mn of bottomline opportunities

Efficient gauge utilization and cost control

Improved end to end on time delivery

Big data driven capacity generation

Enhanced inventory management
